

New VPN Access – Cisco AnyConnect

- 1- You'll receive an e-mail with information about the new account.

This is a post-only mailing. Replies to this message are not monitored or answered.

CGI VPN - Account Information:

Group:	IKEA INDUSTRY External
Account ID:	ext_alvmar@ikeaindustry
Name:	Marcelo Alves
email:	marcelo.alves@ikea.com
Mobile:	

Enrollment:
The final step to activate your account is the enrollment.
Please visit the [SelfService](#) site to proceed with the enrollment.

Prior to the enrollment, you must login.

Your login information for the web site are:
User id:
Password:

VPN Client:
Users must run the Cisco VPN client that is available here
[Direct download \(Windows\)](#)

Additional information
<https://myself.cgi.se/tarqa/DownloadPage.aspx>

Userid:
Password:

- 2- Visit the SelfService site, log in with the information received (user ID and Password) and start the enrollment process

Welcome to the self service portal for Access Manager!

Please use the menu above to initiate your request.

Attention

Your account isn't enrolled.

[Start the enrollment process](#)

You can retrieve information about this site from your ordinary CGI contact person.

3- Select your authentication method (I've selected Google Authenticator)

Select Password generator type

Google Authenticator (for Android and iPhone)
 Microsoft Authenticator (for Windows Phone)
 AccMan Authenticator (for Windows PC)
 Hardware

You must now select the type of token (Password Generator) you prefer.
Depending on the settings for your account all options might not be available.

Besides hardware, you can choose between two different types of software tokens, PC-based and for mobile devices.
For mobile devices you can choose between different types of handsets and tablets.

NOTE!

If you choose a PC-based Password generator you **HAVE** to save the installationfile at your PC, otherwise the installation will fail.
So choose to save the installation file locally before launching it.
If you are unsure about if you are using a 32-bit Windows or a 64-bit version, choose the 32-bit software.

To use the password generator in the mobile phone your phone must be able to connect to Internet.

For Android, iPhone and Windows Phone handsets, you must also have user account in the Android-Market, Apple iTunes Store and Windows Store.
The same requirements apply to the tablet.

- 5- After installing the app on your phone, scan the QR code and insert the verification code, click verify and continue.

If you already have a Google Authenticator for this account, please remove it before you add this new one.

1. Open the Google Authenticator app.
2. Create a new account by scanning the barcode shown at the right.
The program notifies you if you need to install a barcode scanner
3. After the Google Authenticator account is created, generate a verification code / password and enter it in the box below.

Verification code / Password:
135623

←

Verified. Click on Continue to the next step.

- 6- You can now download the application for your OS using these credentials (user ID and Password). After installing and opening the program, enter myvpn.cgi.se in the url field and click “Connect”.

VPN Client

[Link to software site...](#)

User id: lctpcisco
Password: B0xar3

The final step in the process is to download your VPN client.
You will see a link above to guide you to the client.

Click on the link and install your VPN client.

When the client is installed and started, you must configure your VPN client before you proceed with the next step in this enrollment.
You will find the client in the lower right corner of your screen.

You must enter the following address in the input field: ra-eu.industry.ikea.com/externals

Cisco AnyConnect Secure Mobility Client →

VPN: Ready to connect.
<enter url here>

7 - The credentials you should user are listed below. Note that the “password” is the code generated by the authenticator

The screenshot shows the CGI Access Manager Self Service portal. At the top, there's a network graphic and the text "Access Manager [Log Out] Self Service". Below the header is a navigation bar with links: Home, Self Service, Resync OATH token, Download page, Information, and About. The main content area has a title "Enrollment" and a message: "Enrollment is done for ext_alvmar@ikeaindustry". To the right, a "Remember" section advises: "Remember your PIN code. Your PIN code is private. Don't write it down, and don't reveal it to anyone else." Below this, a message says "Your enrollment is now completed." A "Verify your account:" section provides instructions: "To use your VPN, just follow the steps below:
1. Start your VPN client.
It should be configured at this point.
2. Press "Connect"
3. Start your software/mobile token.
Not necessary for hardware token.
4. Generate a password.
5. Enter your VPN Account ID ext_alvmar@ikeaindustry
6. Enter the generated password + personal pin.
7. Wait for a positive response in VPN Client." An "Example:" section shows two windows side-by-side. The left window is titled "Cisco AnyConnect" and shows fields for "Username: aalbu@cgi.com" and "Password: [redacted]". The right window is titled "Cisco AnyConnect Secure Mobility Client" and also shows a "VPN:" field with a lock icon and the same "Please enter your username and password." message. Arrows point from the "Password" field in the first window to the "Password" field in the second window, and from the "Personal PIN code" button in the first window to the "Connect" button in the second window. At the bottom right of the portal screen, it says "© CGI Sverige AB".
